Customer Reviews

It's a good book but extremely simple. My kindergartner had one in his classroom and liked it so much he wanted a copy for home. However he can breeze through it in a minute. So just make sure you're buying it for the correct age - probably no older than Kindergarten level.

Bought this for my classroom to be part of our habitat study. Good, understandable information. Nice photographs & easy for even some of my young students to read.

Bought for a kindergarten class for a Ready Gen lesson.
