Customer Reviews

We are big fans of the Magic School Bus series. These books are packed full of information. Each page offers loads to read and discuss. The solar system one is the only one our 3 year old will sit all the way through for. Not because the rest aren't interesting but they just have a ton of information! It's presented well, not boring but he's 3.

We have lots of the Magic School Bus Books and they are all excellent. My kids have been enjoying them for years!! You can't go wrong, even with those who need some "nudging" to pick up a book.

I bought 3 of the Magic School Bus books for my grandchildren. They enjoyed the books but found that they were a little detailed. However, they did enjoy the humor of the teacher and found them to be informative.

I like reading about the planets, so was very pleased to get this easy to understand book about our solar system. I would recommend this to teachers who are teaching students about the planets.

I love it's so good I could see that for hoursIt is full of school district in business and information technology ON scientific research

This book is a good introduction to the solar system for little children. It was listed as used and looks almost brand new.

This is a great book with tons of information for my toddler to soak up. We have read it every night!
