The Geography Book: Activities For Exploring, Mapping, And Enjoying Your World

Synopsis

Get to Know the Earth's Many Forms with Dozens of Fun and Easy Projects From finding directions by the stars, to mapping your neighborhood, to making an earthquake in a box, you'll have a great time learning about the world with The Geography Book. You'll find out how to determine location on the Earth, how maps can provide us with a wide range of information, how different landforms were created, how water has helped shape the Earth, and much more. Using simple materials you'll be able to find around the house or in your neighborhood, you'll be able to create things like a giant compass rose, a balloon globe, a contour potato, a map puzzle, and a tornado in a jar. So get ready for a fascinating trip around the globe.

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

I bought this as a Christmas present for a map-loving church student of mine. I guess that maybe I didn't pay close enough attention to the style of the book when I ordered it, because when it arrived, I was dismayed to find that it wasn't exclusive to map reading and functioned more as a text book from school. Among topics it covers are orienteering and reading weather and oceanography maps. However, my intended recipient was more than thrilled to receive the book. He said that he's studying the same stuff at school and he loves it. He could hardly put it down in order to go through the church service. It was engaging and insightful, he said, and that's saying a lot coming from a kid

who's ADD and hates to read. I recommend this product.

This is an excellent book for Geography teachers. I will be teaching multiple ideas from this book without any thought process on my part. One of the best teacher lesson plan books I have EVER seen!

This book was selected for a resource for my 6th grade class. It has great information for teaching or learning about the various components of geography. Examples: Map skills, maps, and landforms.

As a life-long learner, when I want to learn a new subject I begin with children's books because they assume no prior knowledge of the subject. Many children's books also give one activities to express the concepts. This book met my expectations. I will enjoy working my way through the activities as a base for this new subject of study.

A wealth of hands on activities. Really like that the index links activities with countries.

I ordered this for my grand daughter that is entering a geography bee. It is very educational and would be great for everyone that wants to learn more about geography.
